

Central Manager

[Enterprise Solution]

Comprehensive Multi-Store Polling

Multi-store businesses require special tools and resources to manage a complex communication and information network. Central Manager offers these management tools to larger chains in the same direct, user-friendly format that is the basis for our popular store-based Restaurant Manager™ POS System.

The Central Manager Enterprise Solution, like all ASI software, has been designed with ease-of-use and reliability in mind. The overall look and feel of the software replicates the Backoffice module in each Restaurant Manager site license. The system includes multiple automated processes that aim to guarantee successful completion of the overnight polling process. Detailed information on the polling process is available onscreen at the end of each polling session.

The system also allows polling to take place regardless of whether an individual store is open and operating. In the rare case when there has been an overnight communication error, a manager can instantly poll the affected stores based on the onscreen polling report.
