

Online Ordering

[Web Service]

Direct from the Web to Your Kitchen

Use Restaurant Manager's Online Ordering Service to post your menu on your website, process orders and payments online and then automatically route orders to prep printers or (KDUs) in the kitchen. Gone are the days of an online order being efficiently placed in cyberspace and inefficiently retrieved via fax or email. Online Ordering from Restaurant Manager is seamlessly integrated to the POS system at your restaurant. A Restaurant Manager Online Order even prints with directions for delivery or pick-up and is tagged as part of its own revenue center to be tracked in the backoffice for reporting. Additionally, any changes made to the menu in the Restaurant Manager Backoffice are instantly reflected on the online ordering web pages on your website.

The screenshot shows the online ordering interface for 'Chat & Chew Restaurant'. The page includes a header with the restaurant name, logo, and hours of operation (06:00 AM - 04:00 PM and 09:00 PM - 12:00 AM). Below the header is a navigation bar with links for 'My Account', 'My Address', 'Order Status', 'Order History', and 'Log Out'. The main content area is divided into three sections: 'Lunch Menu', 'Appetizers', and 'Order'. The 'Appetizers' section lists items such as Hummus w/ Pita Bread, Buffalo Wings, Onion Rings, Scotch Egg, Smoked Salmon, Baked Fries, and Whiskey Fennel Csa. The 'Order' section shows a list of items added to the cart, including 2 Hummus w/ Pita Bread, 1 Buffalo Wings, 1 Scotch Egg, and 1 Scotch Beef. The total amount is \$26.98. There are buttons for 'Clear Order' and 'Next'.

Orders placed online by customers are processed for payment and then routed directly to the preparation areas in your kitchen.
