

Web Browser Interface

[Web Service]

You CAN be Two Places at Once

The Restaurant Manager™ Browser Interface lets you be a hands-on manager no matter where you are. Using any standard web browser, you can access your Restaurant Manager system in real time for an up-to-the-minute picture of what's going on in your business. You can call in from another restaurant, from your home office... or from a yacht in the Caribbean to keep a close eye on your business without being trapped there seven days a week.

Monitor real-time cost of sales, view the latest item deletions, or check which employees are still on the clock. It's even easy to view reports on-screen or print them to a local printer.

Of course, system security is guaranteed whether you dial in with a modem or use DSL or T-1 access. User defined security levels and passwords ensure that only authorized personnel have remote access to the system. Your access of the system goes undetected on-site, even though you are gathering and viewing data real time.

The Restaurant Manager Browser Interface's online reporting capabilities are another powerful example of the control and freedom Restaurant Manager can offer you.
